CFA Level III Candidate & MS Financial Mathematics Graduate (4.0 GPA), IITB-Economics alum proficient in Python, R, and Valuation Quantamental Analyst with proven 450 bps outperformance, seeking roles in Asset Management, Quant Research, IB, or Corporate Strategy

EDUCATION

University of Illinois Urbana-Champaign, Gies College of Business

Dec 2025

Master of Science in Financial Mathematics (STEM designated program), GPA: 4.00/4.00

- Awards: MSF Medalist for Academic Excellence Award, Beta Gamma Sigma Honor Society, Phi Kappa Phi Honor Society
- Credentials: CFA Level 3 Candidate (Passed Level 1 and Level 2 in 1st attempt)

Indian Institute of Technology Bombay (IITB)

Jul 2023

Bachelor of Science in Economics

- Rank: All India Rank (AIR) of 1458 in JEE-Advanced among 230k aspirants (Top 0.62%)

WORK EXPERIENCE

Shree Financial Services

Jul 2023 - Jul 2024

Equity Research Analyst and Trader

Mumbai, India

- Engineered a proprietary trading strategy capitalizing on cyclical and seasonal stock trends, successfully delivering 450 bps outperformance over benchmark in FY 2024, performed scenario analysis for portfolio risk assessment using extensive data science methods
- Analyzed 50+ Banking / Infra stocks (Python, CapIQ); built 10-year DCFs and comp analysis to optimize client portfolio allocations
- Developed a systematic factor-attribution model in Python to isolate idiosyncratic alpha from Beta, identifying 4+ key performance drivers and optimizing position sizing across 15+ diverse sector-specific sub-strategies to maintain a balanced risk profile

Research Analyst Intern

May 2022 - Jul 2023

- Executed multivariate regression analysis quantifying the impact of 10+ macroeconomic drivers on INR/USD and INR/EUR valuations, applying findings to optimize currency risk hedging strategies for global asset portfolios incorporating structural break adjustments
- Conducted fundamental macroeconomic analysis and CAPM modeling on 30+ equities to evaluate risk-adjusted return potential

Opulence Business Solutions

May 2021 - Aug 2021

Financial Analyst Intern

Ahmedabad, India

- Developed integrated financial models using Python & Excel for a client's Fintech Hedge Fund launch, simulating 5+ scenarios to forecast the impact of acquisition strategies and AUM scale-up to drive revenue growth, guiding strategic investment decisions
- Diagnosed 5+ macro-micro inefficiencies and proposed fintech solutions to streamline legacy fund operations, mitigating operational risk

CoolAge App

Jun 2020 - Aug 2020

Business Development Analyst Intern

Mumbai, India

- Identified three key growth areas through econometric modeling, boosting venture capital interest amongst 10+ potential partners in the startup

RESEARCH PROJECTS

Real Client Managed Portfolio

Jan 2025 - Dec 2025

- Managed a \$500K real-client equity portfolio using a Quantamental top-down approach, forecasting 6-9 month business cycles via custom econometric and Machine Learning models to estimate inflation and growth trends in US economy to tactically shift asset weights
- Executed rigorous valuation using 10-year DCF modeling and 100k Monte Carlo simulations to pitch high-conviction positions (SLLY, \$PEP), rebalancing the portfolio to align fundamental intrinsic value with projected macro-regime signals to maximize alpha
- Designed a macro framework utilizing OECD G7 leading indicators to classify business cycle phases and evaluated 30-year historical returns across Asset Classes, Sectors, and Countries to define optimal strategic rotation playbook, analyzing 10+ fundamental macro data points

Valuation of Complex Financial Derivative Product (Python)

Jan 2025 - May 2025

- Engineered pricing engines (Black-Scholes, Binomial Trees, Monte Carlo) to value 9+ complex derivative notes, including Autocallable Barrier Notes linked to ORCL, LMT, & SP 500; modeled step-down barriers, memory coupons, & airbag protection for structured products
- Quantified Greeks and valuation errors via Bloomberg, matching benchmarks within <0.01% while cutting tree nodes by 60%

Multi-Asset, AI-Integrated Macro Regime Portfolio Rotation Model (Python, AI Integration, Machine Learning)

Dec 2025 - Present

- Engineering a "Macro Gatekeeper" system utilizing OAS/VIX threshold triggers & a Gemini API sentiment engine to detect regime shifts, automatically scale leverage via a 3-tier ladder using daily data from Jan 2000 to Oct 2025 across diverse asset classes
- Engineering an algorithmic rotation framework to dynamically adjust multi-asset exposures based on Curve Z-Scores and 20-day Sentiment EMA decay, targeting maximized Sortino and minimized drawdown in daily backtesting of diverse multi-asset strategies

Multi-Regime PCA Deconstruction of Sovereign and Credit Term Structures (Python)

Jan 2026

- Executed PCA on 40+ years of Treasury/Corporate OAS data; distilled factors (Level/Slope/Curvature) explaining up to 97.8% variance
- Proved structural risk shifts; demonstrated corporate risk is 57% Level-driven, requiring multi-factor hedging for 23% slope/curvature

IIT Bombay, Undergraduate Research Thesis

Sep 2022 - Jul 2023

- Deployed advanced econometric models (VECM, ADF) in Stata to analyze monthly time series (1997-2023), identifying that rising Gold, CPI, and Forex reserves appreciate INR while Money Supply (M3), Brent Crude price growth depreciates it with 95% statistical significance
- Investigated currency volatility during global shocks (Dot-Com, GFC, Covid) to isolate structural breaks on FX equilibrium dynamics

Deutsche Bank, Munch 4.0

Oct 2020 - May 2021

- Selected (Top 10% of 500+) to engineer an enhanced Beta model for EM equities, attending 10+ expert sessions on financial concepts
- Recalibrated CAPM parameters and Risk-Free Rates to correct pricing irregularities; backtested framework against 10+ NSE stocks

LEADERSHIP & TECHNICAL SKILLS

Leadership Economics and Humanities Department, IIT Bombay

General Secretary (Apr 2021 - Jun 2022) | General Secretary Associate (Aug 2020 - Mar 2021) | Associate Secretary (Apr 2019 - Jul 2020)

- Elected to lead a 15+ member team representing 200+ students in the Academic Council, spearheading post-pandemic return protocols and managing valedictory functions, freshman orientations, and large-scale internship drives to maximize cohort outcomes
- Founded 'RUPEE' research and 'Summer of Economics' programs, relaunching 'KAUTILYA' and 'Econ Weekly' magazines and reducing event costs by 40% through successful deal negotiations and budget management to optimize department resources
- Technical Skills:** Python, R, Machine Learning, Financial Modeling, Big Data, Bloomberg, Capital IQ, Econometrics, Monte Carlo, Derivatives Pricing, Asset Allocation, Economic Analysis, Portfolio Management, Excel (VBA), Risk Analysis (OAS/VIX), Artificial Intelligence (AI) & LLM Integration (Gemini API, NLP), PCA/Dimensionality Reduction, DCF Modeling, SQL, Data Science
